

DEMATECH IS A TURN-KEY SOLUTION PROVIDER TO THE CRAFT BEER AND SOFT DRINK INDUSTRY OFFERING EVERYTHING FROM BREWING EQUIPMENT TO BOTTLING LINES AND PROCUREMENT SERVICES

DEMATECH

**NEW TO
SOUTH
AFRICA!**

The Duotank is based on a unique idea which follows the Bag-In-Tank concept. Fresh beer is stored in airtight bags which are placed inside the pressurized tanks. These beer tanks are then used to store and dispense beer in a bar, restaurant or pub. Essentially bringing the brewery to you!

The beer goes straight from the brewery into insulated beer tanks and into the glasses of your clients. The 100% airtight bag means there is no extra CO2 needed. This means that you are always offering brewery-fresh beer. **Say goodbye to the days of kegging!**

Our Duotanks are available in three sizes 2,5HL, 5HL and 10HL and the outer shells are available in the finish or colour of your choice, we offer both stainless steel, as well as polyurethane.

**copper tanks available on request or paintable*

**PE insulated tanks, paintable*

**PE insulated tanks, with ss cladding*

Ceiling & floor mounted options:

Advantages:

- 1** The beer inside the bags is not exposed to a CO2 atmosphere, therefore **no over-carbonisation of beer can occur.**
- 2** Beer is dispensed simply by using **air** which is pressed between the inner wall of the tank and the bag. This means considerable cost savings due to **no CO2.**
- 3** The beer in the fermenter can be emptied into the Duotank, which in turn makes the fermenter available for the next brew; **increasing the fermenting sequence and production.**

The inside of the cooled beer tank is always made of top quality stainless steel.

Our beautifully finished tanks are modern, trendy & aesthetically pleasing. Branding the Duotanks is also a great way to promote your beer.

The insulated tanks are produced with an advanced PE insulation layer and equipped with copper coil cooling. This allows for constant cold cooling of the tank, making it possible to place the tank anywhere you want, including inside your bar or restaurant interior.

At Dematech we provide top quality solutions for the processing & packaging of beverages
